

# Investment offer MY IDENTITY COIN-MYID

A part of "The Money Project" by OkGlobal Coin SWITCH-MYID

Project inception date: December 2017

**ACCESS**  
Singapore Cryptocurrency and  
Blockchain Industry Association

Member of:

\*MYID coins are utility coins. Utility coins are inherently a high risk investment and therefore all investors should weigh their risks when investing and do their own research prior to making any investment.

# What does “The Money Project” do?

Create a **better alternative to government fiat currency** that cannot be printed into oblivion. A Real MONEY that no other blockchain project to date has offered. -OkGlobal Securities Coin

Building a blockchain based money **backed with various assets** such as gold, silver, properties, services. -OkGlobal Securities Coin

**Offset inflation loss** by generating an income stream from routine financial services that we can NOW do BETTER, CHEAPER & FASTER. Our “break-even” business model of simply offsetting inflation loss gives us **cross industry advantage** while reaching our project aims. -OkGlobal Coin

OPTIONAL ability to add your own identity to your own money to **guard against risks from theft or even negligent loss.** -MY IDENTITY Utility Coin

# **GREAT, BUT HOW DO WE REACH THE PUBLIC TO GROW?**

Welcome to .....

# Our International Service Centres (ISCs)

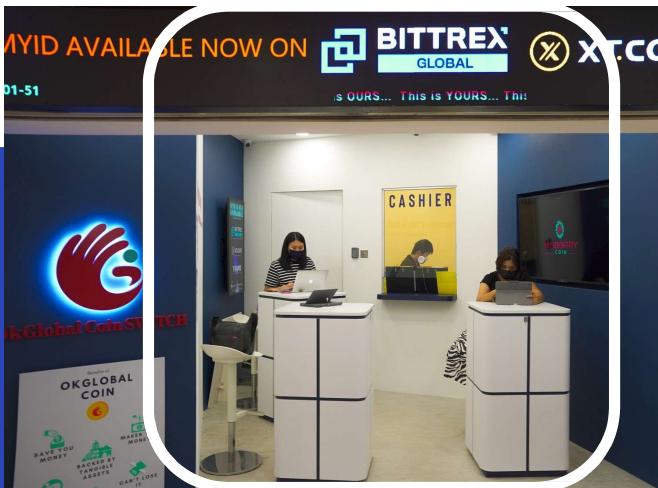

#1 Singapore City Center - #2 California USA, soft opening at the BUSIEST LAND BORDER CROSSING ON EARTH

# *What are the ISCs for?*

OTC sale of our coins. We are the **FIRST TO MARKET!!** We offer in-person assistance and have a unique marketing/growth **ADVANTAGE**. They are also authentication centers for **MY IDENTITY** Proof-of-Person guards against loss or theft.

## FUTURE BORDERLESS BLOCKCHAIN BANKING CENTERS

Singapore

USA

SOUTH KOREA, JAPAN,  
GERMANY, INDONESIA,  
PHILIPPINES

Ok, but I don't get it. Why  
would anybody want to  
buy **MY IDENTITY** Coins?

# The use cases for MY IDENTITY Coins

---

“

## Protect

Used as a transaction/gas fee (99% cheaper than Visa/Mastercard) paid to protect your cryptomoney. Senders have immediate platform and secondary traditional recovery options in case of theft, scams or even negligent loss. No practical remedies currently exist in the marketplace for these issues! Just us.

## Grow

Tremendous opportunity to buy MYID at the startup price and make 100x, 200x or more RETURNS fast because that has already occurred before without our project marketing/development/growth initiative!

## Save

Access to the most competitive money changing and remittance fees. Make money from coins going up in value and save money from fees. Additional money saving services will be offered in financial, travel and service sectors.

**There are no ISCs near me yet.**

**No problem. Go to....**

# Han S. Kim

Founder, CEO of “The Money Project” by OkGlobal Coin  
SWITCH-MYID.

Experienced in insurance, finance, research, medicine, law, coding, polyglot and burgeoning technology.

Lead developer and researcher building CLARUS blockchain, MY IDENTITY Proof-of-Person proprietary technology, payments wallet and SEC compliant securities offering.

Successfully opened a malpractice insurance brokerage with less than \$5k USD in 1999 and became No.1 in California by 2015.

**Lead by performance.**

# Senior Management Team

Our team consist of Integrity, History, Talent, Innovation, Leadership, Transparency

## HISTORY

### Shultz Wang

Project Oversight Manager

Specialized tech development and assist to communicate with the coders.

Worked for Samsung Electronics, Google, Oppo and Vivo.

## INTEGRITY

### Brandon Tee

Corporate Counsel

Legal Counsel  
Head of Corporate Law Practice at WMH Law Corporation. Mr. Tee has been involved in some of the largest initial public offerings in Singapore.

The founder and director of B7 Capital, a sector agnostic venture capital firm which invests in early stage startups

## TALENT

### Niranjan Singh

Technical Advisor

Specializing in tech platforms especially in the blockchain field.  
Graduated from Penn State University and has won a major hackathon at PSU.

Owns blockchain consulting firm in Silicon Valley.

# Singapore Team

**Yves Bong**

General Manager

**Samuel Ching**

Accountant

**Lenz Angelo**

Creative Lead

**Joyce Ting**

Marketing Executive

TRANSPARENCY

# YouTube Docuseries

We are the most transparent blockchain project in the world.

The **ONLY** blockchain project in the world with storefronts to convert to borderless blockchain banking solution centers.

Valley.

**PROOF OF PERSON**

We are the only project in the world using Proof of Person technology to protect against theft or loss of your next generation borderless money.

**CLARUS BLOCKCHAIN**

CLARUS blockchain beta release next year with social-business networking payment app using SWITCH stable coins tied to the optional MY IDENTITY Proof of Person tech that is proprietary to our project alone.

**YouTube YOUTUBE DOCUSERIES**

We are the ONLY project to be so transparent and only in the world with ISCs that will later convert to the first publicly owned non-profit borderless blockchain banking system in the world.

# BUILDING STRONG GLOBAL PARTNERSHIPS: In collaboration with the Border Fusion Initiative

Bringing the border community together through a binational trading vision.

- Miguel Aguirre

Our project colleagues in training  
at the second International  
Service Center.

Our first MY IDENTITY Coin purchaser in USA.  
A retired school teacher who has wanted to  
invest in cryptocurrencies but needed  
assistance to navigate the confusing process.

WE ARE THE BRIDGE for the general public.

How many coins do you have in circulation?

What is the coin allocation?

How do you plan on releasing them?

Is there a capped amount?

---

# Great Question! You've done this before.

Total MYID Coin supply is 100 Billion.

Less than 1% has been released into circulation via exchanges, our initial coin offering and sales at our International Service Centers.

60% of 100 billion is allocated for public purchase. The remaining 40% is locked for the team, founder, partners and project development needs.

The supply is capped. The supply may be reduced/burnt if it suits project logic and community benefit.

The remaining 59 billion will be released per sale as per demand as per market price on exchanges and via our International Service Centers, to not flood demand and to encourage an organic price drive.

Fine. But why should I invest? I worked hard for my money. I want to know when I can expect returns and I want A LOT!

Answer that!

This is why we did and others have.....

# **WHY WE INVEST IN OUR PROJECT:**

**-100X, 200X, or more quick return expectation. Based on past performance**

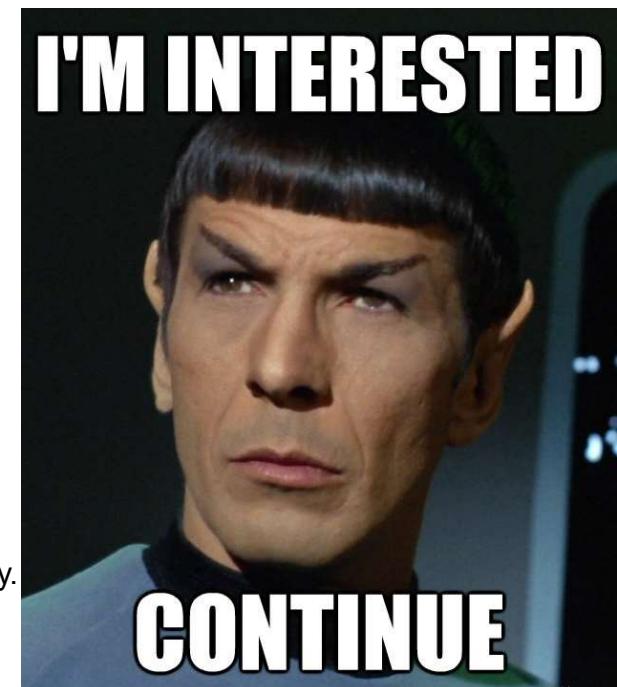

but this time due to our marketing execution, project history and technology development. Not simply wild speculation.

**-We are experienced and mature.** A global senior management team with wide technical skills, star legal counsel, *history of success* at other endeavors, respected community pillars/project partners and public credibility. Over 1 million USD has already been invested, \$500K of that coming from the project founder himself. Along with 5 years of project research and development to ensure the public sees a maturing product/consistent project growth.

**-We are the industry leader.** The *ONLY blockchain project with International Service Centers* to sell coins in-person and ease transition of the public and often “un-banked” to the new borderless blockchain economy. With the only real world solution to cryptocurrency theft or negligent loss.

**-We are well researched and armed.** The only project with 3 coins as a logical solution to onboard/transition and benefit the general public while following regulations and offering security as well as innovation and *ease of access to the community*.

**-We are about to go to the moon!!** Strong marketing push and advantage.

Ok. Makes sense but how do you plan on increasing the MYID coin price?

I love that all time high of \$0.33 USD.  
Can you do it again??

---

Here is how we plan on doing it but this time on purpose.....

*You had me at hello*

---

## Use of funds:

2022 Expansion into Philippines, India, South Korea, Japan, Indonesia, Malaysia, Germany and Mexico. Along with an aggressive marketing push and addition of other exchanges to sell our coins. Minimum one top 5 exchange addition and continued development costs necessary to build our CLARUS blockchain, MYID-WALLET, supporting technologies and infrastructure.

# HOW WE WILL INCREASE MY IDENTITY COIN PRICE IN 2022:

- Listing of MYID Coins and marketing on, at minimum, **one top 5 exchange. Along with additional top tier exchange listings.**  
-Highest impact on coin price and demand likely will come from the listing of MY IDENTITY Coin to new top exchanges. BASED UPON OUR OWN PAST PERFORMANCE and the price performance of other projects listing on top exchanges. Our ISCs will sign up coin holders but currently not at the rate that is possible when done on CEXs, Centralized Exchanges (Binance, Coinbase, FTX, HUOBI, Kraken, etc.), where traders have already gone thru on-boarding and can simply buy our coins with a few clicks.
  - **Launch of USA ISC and others around the world.** ISCs are a powerful marketing/branding advantage and public on-boarding bridge that no other project has capitalized upon:  
-Our ISCs offer money savings services that people already use. We require a minimum MYID purchase of \$5 USD to enjoy the benefits. The average purchase at our ISCs has been upwards of over \$50/person. We offer a win/win situation. The consumer wins by getting coins that may increase in value and the consumer saves money immediately on services he/she would have used anyways. We begin by offering money changing services free/at-cost. Funds generated at ISCs are used to "buy-back" our own coins on CEXs, after paying for necessary operation costs. Thereby we increase liquidity and an organic upward price drive of MYID Coins.  
-Traditional **boots on the ground** marketing at our global ISCs to their communities.  
-TREMENDOUS bridging opportunity and use of decentralized blockchain technology to bank the "Un-Banked".  
-Easiest on-boarding process in the world. OUR STAFF does the work for the public. This is a necessity for a large percentage of the general population who are intimidated, had no real financial incentive and/or uneducated about the process.
- BANKING FOR THE "UN-BANKED"** : Create non-id accounts for the un-banked and who MAY wish to stay anonymous. MYID is an optional identification technology that can be used for its utility purpose or can be used as a value speculation instrument. (Re-sale at profit.)
- Social media influencers via YouTube, Facebook, Instagram, TikTok, twitter, etc..
  - Roadshows/conferences and promotion of blockchain basics education courses leading to the sales of MYID coins to attendees.
  - Traditional print, billboard, tv and radio outreach/marketing.
  - **Beta testing** with merchants and consumers in Singapore, Downtown San Diego and USA-Mexico in the economic development zone outlined by our project colleagues at the "Border Fusion Initiative". The region was recently awarded the World Design Capital, beating out Moscow and our project colleagues were at the forefront of leading the initiative for the award to be granted. Our project will be highlighted/featured as part of the World Design Capital and Border Fusion Economic Development Plan. We will be well positioned to expand and market our project globally while making a cross border impact on many people who truly would benefit from our project the most, the under privileged and often with the least opportunities in our society.

A video asking the local community their thoughts about our project at our 2<sup>nd</sup> ISC site: <https://www.youtube.com/watch?v=BIEIXGkdz7M&t=7s> "Changing money at-cost but with a catch".

---

## **Of special note:**

\*ONLY MYID utility coins are available for purchase now. OkGlobal Securities Coin offering is scheduled for 3rd or 4th quarter of 2022. As typical with other securities offering, OkGlobal Securities Coin is a highly restricted sale. Terms and conditions of the securities offering will be made available at a later date. SWITCH stable coins will be made available for purchase with the launch of our own unique blockchain(CLARUS) and consumer/merchant payment wallet(MYID-WALLET) 2nd or 3rd quarter of 2022.

SWITCH stable coins are not an investment vehicle but USD backed stable payment bridge/currency necessary for merchants to avoid possible price/value loss until OkGlobal Securities Coins build up a history to become a stable consistently growing hedge against inflation and absolute value loss preferred by merchants.

SWITCH stable coins are intended for merchant use to avoid volatility but because they are backed by fiat currency, they are not a hedge against inflation and are not asset backed, therefore have no guards against absolute loss!

Our suggestion.. Buy MYID now...make some profits. Then take some of those profits later and participate in the securities offering. This is logical.

# FIRST TO MARKET

Blockchain Banking solution storefronts!!

OKGLOBAL COIN  
...by OkGlobal Coi

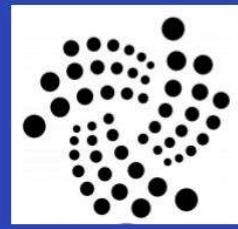

**DON'T FORGET THE 3 CORES OF OUR PROJECT.**

1. **Offset inflation** loss to retain purchasing power year after year.
2. **Asset backed** digital borderless MONEY that cannot be printed into oblivion.
3. **Protected** against theft or negligent loss.

Projects of note that we improve upon to meet OUR project aims.

# THE MONEY PROJECT

by OkGlobal Coin SWITCH - MYID

# THE MONEY PROJECT

by OkGlobal Coin SWITCH - MYID

## Milestones Accomplished

### FIRST ISC IN SINGAPORE

First International Service Center successfully launch in Singapore.

Assisting current MYID coin holders and provide onboarding services.

### MY IDENTITY COIN OPENING

MY IDENTITY COIN opening listing day on April 27, 2021.

Tradable on both  
BITTREX GLOBAL & XT.COM

ALL-TIME HIGH: \$0.33 USD

### SECOND ISC IN USA

On-boarding of new coin holders at our 2nd ISC in the USA, at the busiest land border crossing on Earth.

### SUCCEFUL BETA-TESTING OF CLARUS

Our unique chain is alive/reactive to the changing needs of our community. No hard forking or node "down time" to execute adjustments/upgrades to blockchain software/code modifications.

## Coming Soon 2022

### LAUNCH OF CLARUS BLOCKCHAIN

Beta-testing of consumer/merchant payment app to be introduced in 2022

### FUTURE ISCs

South Korea, Japan, Germany, Indonesia, and the Philippines are all preparing to launch within 2022

1000s of our international service centers (blockchain banking solutions) to open within the next several years.

### TOP 5 EXCHANGE LISTING

The release of MYID Coins for trade on at least one top 5 exchange in 2022

We will increase our community size and have more to present to potential new MYID coin holders before we release our coins for listing on new exchanges.

CURRENT PRICE:\$0.0006/MYID

\$100 PURCHASE = \$55,000 USD  
AT ALL TIME HIGH AGAIN!

I AM PART OF THE ELDEST  
FILTHY-RICH  
& POWERFUL 1% RULING-CLASS

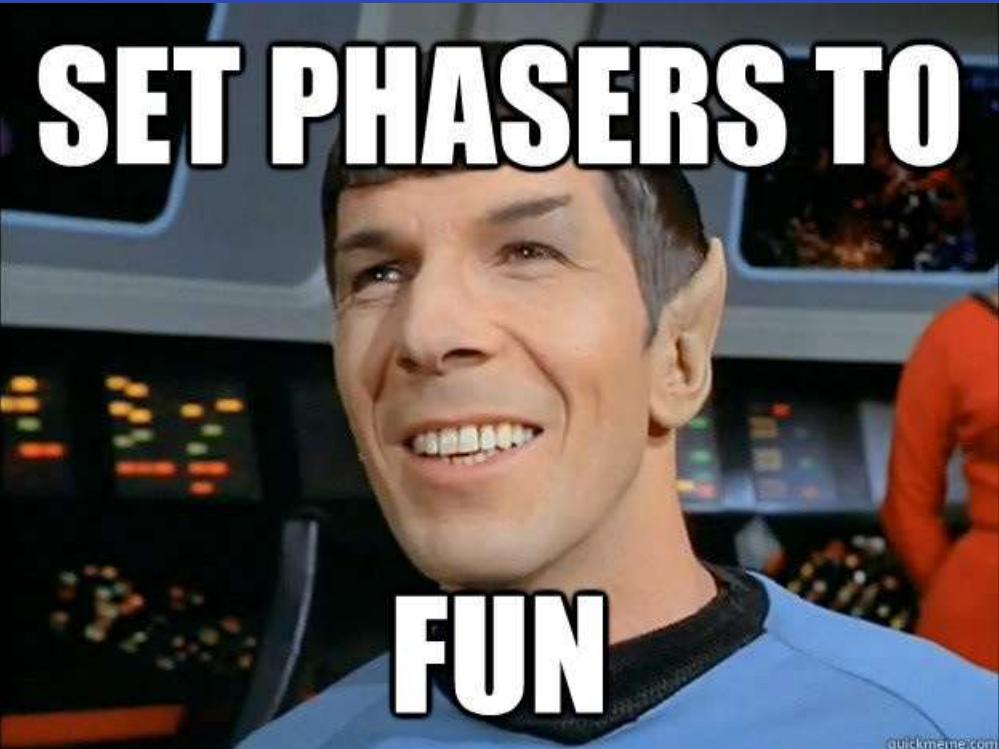

Our current coin holder community size is less than several thousand. We are at the J curve of our project. We continue to innovate and as other traditional industries either collapse or consolidate, we have grown stronger and are at the breakout point of global project public awareness.

Through extensive on-going research, planning, technology innovation that improves lives, a business model that will disrupt long standing financial services industries and a global marketing strategy to be executed, we stand confident that we will reach and exceed our all-time high price. We ask for your attention and your investment. In return we offer our team, our history, our product and an opportunity for astronomical returns in a yet burgeoning market in its infancy.

So why invest? .....Its only logical.
